

# Interior Sheets

Reliability and durability where you apply it

## Product Description

Ultracem Interior Sheets are made of reinforced cement with mineralized fibers. Our interior sheets are lightweight, practical and versatile making it easy to transport and work with. Use Ultracem interior sheets for divisions, repairs, expansions, redesigns, and much more. These advantages allows for quick and simple installation with no complications.

**Size: 4' x 8' x 8 mm**

## Uses

**Ceilings** - Ultracem Interior Sheets can be safely used in residential, and in commercial or institutional buildings where there is low traffic. Due to the nature of their components; Ultracem interior walls are perfect to be used in high transit areas exposed to high risk of damage.

**Dry Interior Walls** - Most suitable for those areas not exposed to moisture. They usually serve as divisions on walkways, rooms, and other dry areas.

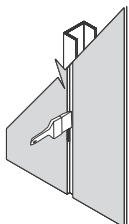

**Wet Interior Walls** - Most suitable for those areas that are temporarily or permanently exposed to moisture - such as laundry rooms, bathrooms, sinks, kitchens, etc.

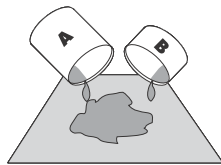

## Advantages

- Does not contain hazardous products
- They may be cut, sanded, nailed, drilled, and screwed with conventional tools
- They provide acoustic and thermal insulation
- They accept any type of finish
- Water, fire & termite resistant

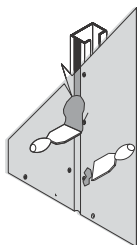

## Joint Treatment Guide

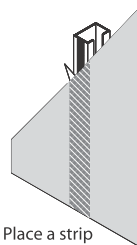

1. Remove dust from the joint

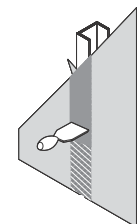

2. Mix the two epoxy components in the proportions indicated in the Technical Sheet (1 part of component A and two parts of component B). Mix well.

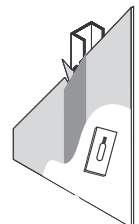

3. Fill the joint 100% and apply a thin layer of the mix on the joint (2.7" width)

4. Place a strip of joint mesh along the joint. Secure it on the surface with a trowel

5. Fully cover the mesh with a second layer of epoxy mix

6. Let dry for 24 hours. Evenly prime the surface until the mesh is hidden; sand it and paint it

**ULTRACEM**

The New Cutting Edge in Constructive Solutions

Impact-Resistant

Lightweight and resistant

Plague-resistant

Water Repellent

Moisture-resistant

Non-combustible

Easy Installation
