

Ultrafix

Technical screw guide

Description

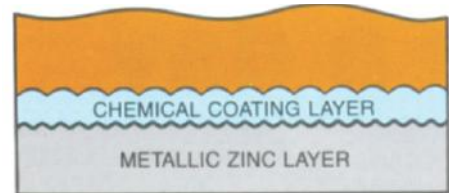

Ultrafix Construction Screws are the first choice of the construction industry. Building construction professionals know they can rely on consistency of performance, and the widest selection for today's steel, wood and composite applications. The right tools and fasteners for the right jobs mean speed and ease of installation every time. Use Ultrafix on your decks, metal buildings, sidings, spas, gazebos, barns and gutters.

LL / Metal - Metal	PL / Wood & Metal	LH / Metal - Metal	PH / Metal	Types of Screws
 <p>> Type: LL</p>	 <p>Phillips tip > Type: PL</p>	 <p>Phillips tip > Type: LH</p>	 <p>> Type: PH</p>	 <p>Tek-bit tip fixing on 20 or more caliber metal</p>  <p>Self-tapping Sharp tip fixing on wood or 24-caliber metal</p>

Advantages

Our GrabberGard exterior finish provides superior protection from rust and corrosion. GrabberGard withstands destructive elements like salt water, chemicals, acid rain, sunlight and industrial pollutants.
